1	Forms	15-35
2	Guidance	36-43

1. Aims

This policy aims to ensure that:

- Pupils, staff and parents understand how Evolve Academy will support pupils with medical conditions
- Pupils with medical conditions are properly supported to allow them to access the same education as other pupils, including Evolve Academy trips and sporting activities

The governing board will implement this policy by:

- Making sure sufficient staff are suitably trained
- Making staff aware of pupils' conditions, where appropriate
- Making sure there are cover arrangements to ensure someone is always available to support pupils with medical conditions
- Providing supply teachers with appropriate information about the policy and relevant pupils
- Developing and monitoring individual healthcare plans (IHPs)

The named person with responsibility for implementing this policy is David Kiss (Headteacher).

2. Legislation and statutory responsibilities

This policy meets the requirements under [Section 100 of the Children and Families Act 2014](#), which places a duty on governing boards to make arrangements for supporting pupils at their Academy with medical conditions.

It is also based on the Department for Education (DfE)'s statutory guidance on [supporting pupils with medical conditions at Academy](#).

3. Roles and responsibilities

3.1 The CEO

The CEO has a responsibility to:

Ensure that the medical conditions policy is in line with local and national guidance and policy frameworks.

Ensure that the policy is reviewed by the Trust annually

3.2 The headteacher

The headteacher will:

- Make sure all staff are aware of this policy and understand their role in its implementation
- Ensure that there is a sufficient number of trained staff available to implement this policy and deliver against all individual healthcare plans (IHPs), including in contingency and emergency situations
- Ensure that all staff who need to know are aware of a child's condition
- Take overall responsibility for the development of IHPs
- Make sure that Evolve Academy staff are appropriately insured and aware that they are insured to support pupils in this way
- Contact the Evolve Academy nursing service in the case of any pupil who has a medical condition that may require support at the Academy, but who has not yet been brought to the attention of the Academy nurse
- Ensure that systems are in place for obtaining information about a child's medical needs and that this information is kept up to date

3.3 Staff

Supporting pupils with medical conditions during Academy hours is not the sole responsibility of one person. Any member of staff may be asked to provide support to pupils with medical conditions, although they will not be required to do so. This includes the administration of medicines.

Those staff who take on the responsibility to support pupils with medical conditions will receive sufficient and suitable training, and will achieve the necessary level of competency before doing so.

Teachers will take into account the needs of pupils with medical conditions that they teach. All staff will know what to do and respond accordingly when they become aware that a pupil with a medical condition needs help.

3.4 Parents

Parents will:

- Provide the Academy with sufficient and up-to-date information about their child's medical needs
- Be involved in the development and review of their child's IHP and may be involved in its drafting
- Carry out any action they have agreed to as part of the implementation of the IHP, e.g., provide medicines and equipment, and ensure they or another nominated adult are contactable at all times

3.5 Pupils

Pupils with medical conditions will often be best placed to provide information about how their condition affects them. Pupils should be fully involved in discussions about their medical support needs and contribute as much as possible to the development of their IHPs. They are also expected to comply with their IHPs.

3.6 Academy nurses and other healthcare professionals

Our Academy nursing service will notify the Academy when a pupil has been identified as having a medical condition that will require support in school. This will be before the pupil starts at the Academy, wherever possible. They may also support staff to implement a child's IHP.

Healthcare professionals, such as GPs and paediatricians, will liaise with the Academy's nurses and notify them of any pupils identified as having a medical condition. They may also provide advice on developing IHPs.

4. Equal opportunities

Evolve Academy is clear about the need to actively support pupils with medical conditions to participate in Evolve Academy trips and visits, or in sporting activities, and not prevent them from doing so.

Evolve Academy will consider what reasonable adjustments need to be made to enable these pupils to participate fully and safely on Evolve Academy trips, visits and sporting activities.

Risk assessments will be carried out so that planning arrangements take account of any steps needed to ensure that pupils with medical conditions are included. In doing so, pupils, their parents and any relevant healthcare professionals will be consulted.

5. Being notified that a child has a medical condition

When Evolve Academy is notified that a pupil has a medical condition, the process outlined below will be followed to decide whether the pupil requires an IHP.

Evolve Academy will make every effort to ensure that arrangements are put into place within 2 weeks, or by the beginning of the relevant term for pupils who are new to our Academy.

See Appendix A.

6. Individual healthcare plans (IHPs)

The headteacher has overall responsibility for the development of IHPs for pupils with medical conditions.

Plans will be reviewed at least annually, or earlier if there is evidence that the pupil's needs have changed.

Plans will be developed with the pupil's best interests in mind and will set out:

- What needs to be done
- When
- By whom

Not all pupils with a medical condition will require an IHP. It will be agreed with a healthcare professional and the parents when an IHP would be inappropriate or disproportionate. This will be based on evidence. If there is no consensus, the headteacher will make the final decision.

Plans will be drawn up in partnership with Evolve Academy, parents and a relevant healthcare professional, such as the Evolve Academy nurse, specialist or paediatrician, who can best advise on the pupil's specific needs. The pupil will be involved wherever appropriate.

IHPs will be linked to, or become part of, any education, health and care (EHC) plan. If a pupil has SEN but does not have an EHC plan, the SEN will be mentioned in the IHP.

The level of detail in the plan will depend on the complexity of the child's condition and how much support is needed. The Trust and the headteacher will consider the following when deciding what information to record on IHPs:

- The medical condition, its triggers, signs, symptoms and treatments
- The pupil's resulting needs, including medication (dose, side effects and storage) and other treatments, time, facilities, equipment, testing, access to food and drink where this is used to manage their condition, dietary requirements and environmental issues, e.g., crowded corridors, travel time between lessons
- Specific support for the pupil's educational, social and emotional needs. For example, how absences will be managed, requirements for extra time to complete exams, use of rest periods or additional support in catching up with lessons, counselling sessions
- The level of support needed, including in emergencies. If a pupil is self-managing their medication, this will be clearly stated with appropriate arrangements for monitoring
- Who will provide this support, their training needs, expectations of their role and confirmation of proficiency to provide support for the pupil's medical condition from a healthcare professional, and cover arrangements for when they are unavailable
- Who in Evolve Academy needs to be aware of the pupil's condition and the support required
- Arrangements for written permission from parents and the headteacher for medication to be administered by a member of staff, or self-administered by the pupil during Evolve Academy hours

- Separate arrangements or procedures required for Evolve Academy trips or other activities outside of the normal Evolve Academy timetable that will ensure the pupil can participate, e.g., risk assessments
- Where confidentiality issues are raised by the parent/pupil, the designated individuals to be entrusted with information about the pupil's condition
- What to do in an emergency, including who to contact, and contingency arrangements

7. Managing medicines

Prescription and non-prescription medicines will only be administered at Evolve Academy:

- When it would be detrimental to the pupil's health or Academy attendance not to do so **and**
- Where we have parents' written consent

The only exception to this is where the medicine has been prescribed to the pupil without the knowledge of the parents.

Pupils under 16 will not be given medicine containing aspirin unless prescribed by a doctor.

Anyone giving a pupil any medication (for example, for pain relief) will first check maximum dosages and when the previous dosage was taken. Parents will always be informed.

Evolve Academy will only accept prescribed medicines that are:

- In-date
- Labelled
- Provided in the original container, as dispensed by the pharmacist, and include instructions for administration, dosage and storage

Evolve Academy will accept insulin that is inside an insulin pen or pump rather than its original container, but it must be in date.

All medicines will be stored safely. Pupils will be informed about where their medicines are at all times and be able to access them immediately. Medicines and devices such as asthma inhalers, blood glucose testing meters and adrenaline pens will always be readily available to pupils and not locked away.

Medicines will be returned to parents to arrange for safe disposal when no longer required.

7.1 Controlled drugs

[Controlled drugs](#) are prescription medicines that are controlled under the [Misuse of Drugs Regulations 2001](#) and subsequent amendments, such as morphine or methadone.

A pupil who has been prescribed a controlled drug may have it in their possession if they are competent to do so, but they must not pass it to another pupil to use. All other controlled drugs are kept in a secure cupboard in the Evolve Academy office and only named staff have access.

Controlled drugs will be easily accessible in an emergency and a record of any doses used and the amount held will be kept.

7.2 Pupils managing their own needs

Pupils who are competent will be encouraged to take responsibility for managing their own medicines and procedures. This will be discussed with parents and it will be reflected in their IHPs.

Pupils will be allowed to carry their own medicines and relevant devices wherever possible. Staff will not force a pupil to take a medicine or carry out a necessary procedure if they refuse, but will follow the procedure agreed in the IHP and inform parents so that an alternative option can be considered, if necessary.

7.3 Unacceptable practice

Evolve Academy staff should use their discretion and judge each case individually with reference to the pupil's IHP, but it is generally not acceptable to:

- Prevent pupils from easily accessing their inhalers and medication, and administering their medication when and where necessary
- Assume that every pupil with the same condition requires the same treatment
- Ignore the views of the pupil or their parents
- Ignore medical evidence or opinion (although this may be challenged)
- Send children with medical conditions home frequently for reasons associated with their medical condition or prevent them from staying for normal Academy activities, including lunch, unless this is specified in their IHPs
- If the pupil becomes ill, send them to the Evolve Academy office or medical room unaccompanied or with someone unsuitable
- Penalise pupils for their attendance record if their absences are related to their medical condition, e.g., hospital appointments

- Prevent pupils from drinking, eating or taking toilet or other breaks whenever they need to in order to manage their medical condition effectively
- Require parents, or otherwise make them feel obliged, to attend Evolve Academy to administer medication or provide medical support to their pupil, including with toileting issues. No parent should have to give up working because Evolve Academy is failing to support their child's medical needs
- Prevent pupils from participating, or create unnecessary barriers to pupils participating in any aspect of Academy life, including Academy trips, e.g., by requiring parents to accompany their child
- Administer, or ask pupils to administer, medicine in Academy toilets

8. Emergency procedures

Staff will follow the Academy's normal emergency procedures (for example, calling 999). All pupils' IHPs will clearly set out what constitutes an emergency and will explain what to do.

If a pupil needs to be taken to hospital, staff will stay with the pupil until the parent arrives, or accompany the pupil to hospital by ambulance.

9. Training

Staff who are responsible for supporting pupils with medical needs will receive suitable and sufficient training to do so.

The training will be identified during the development or review of IHPs. Staff who provide support to pupils with medical conditions will be included in meetings where this is discussed.

The relevant healthcare professionals will lead on identifying the type and level of training required and will agree this with the headteacher / role of individual. Training will be kept up to date.

Training will:

- Be sufficient to ensure that staff are competent and have confidence in their ability to support the pupils
- Fulfil the requirements in the IHPs
- Help staff to have an understanding of the specific medical conditions they are being asked to deal with, their implications and preventative measures

Healthcare professionals will provide confirmation of the proficiency of staff in a medical procedure, or in providing medication.

All staff will receive training so that they are aware of this policy and understand their role in implementing it, for example, with preventative

and emergency measures so they can recognise and act quickly when a problem occurs. This will be provided for new staff during their induction.

10. Record keeping

The Trust will ensure that written records are kept of all medicine administered to pupils for as long as these pupils are at Evolve Academy. Parents will be informed if their pupil has been unwell at Academy.

IHPs are kept in a readily accessible place which all staff are aware of.

11. Liability and indemnity

The Trust will ensure appropriate insurance and indemnity is in place for all staff involved in the care of young people with medical conditions and those volunteers who administer medication to pupils with medical conditions.

12. Complaints

Parents with a complaint about their child's medical condition should discuss these directly with the headteacher in the first instance. If the headteacher cannot resolve the matter, they will direct parents to the Evolve Academy complaints procedure.

13. Monitoring arrangements

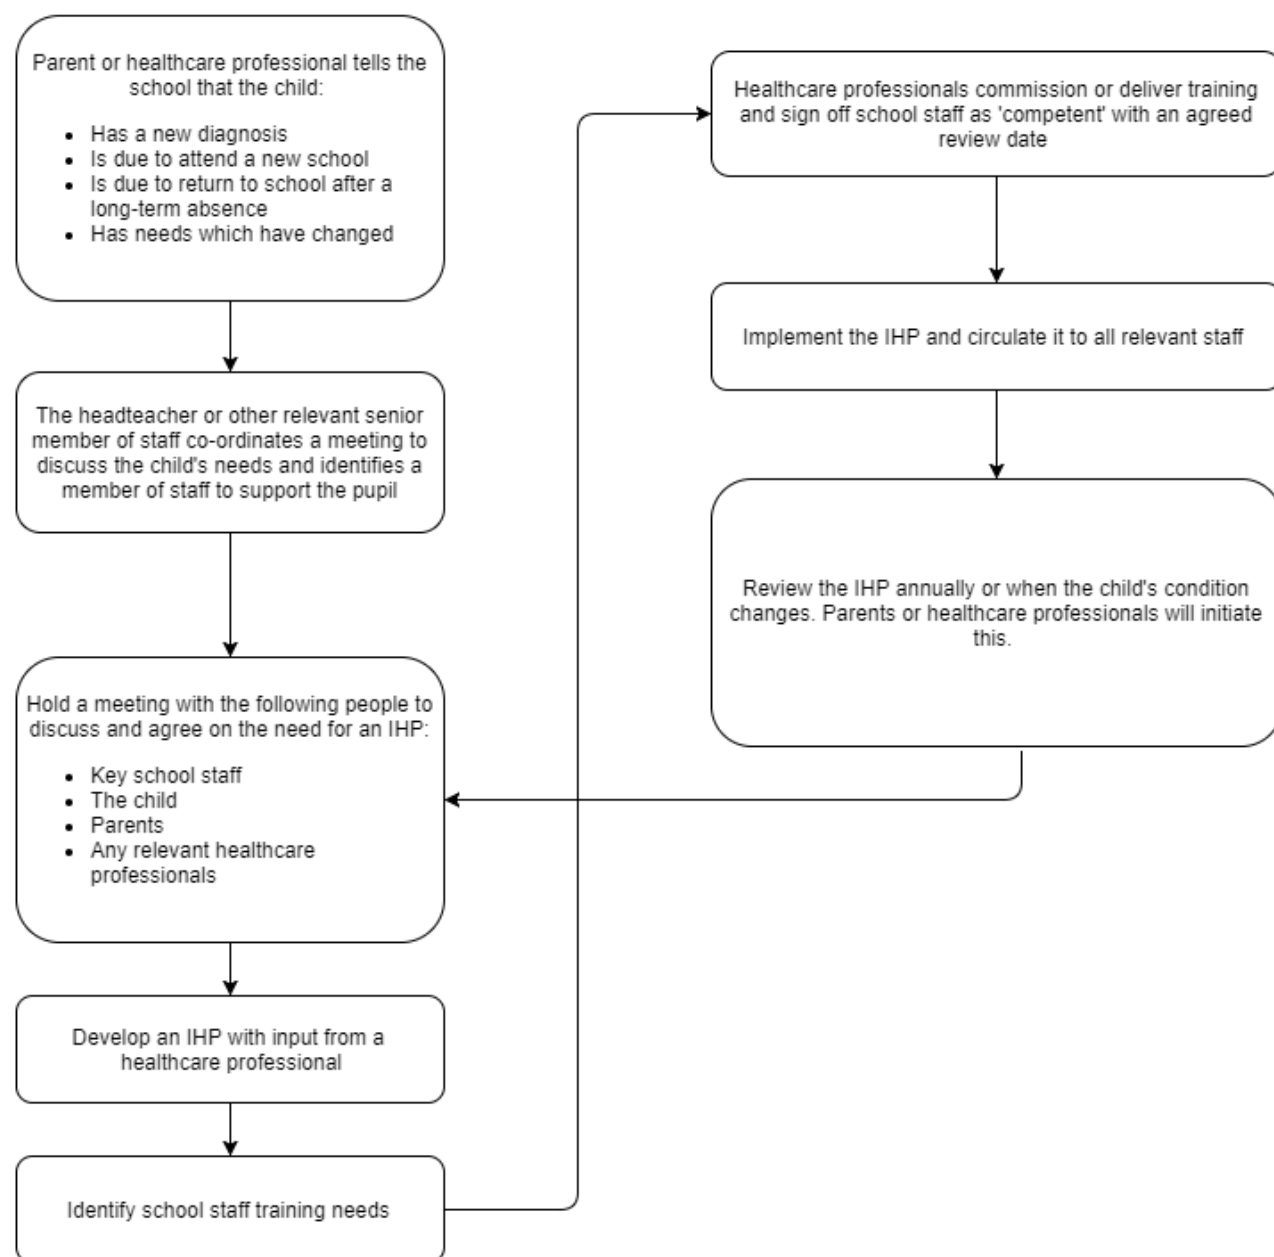

This policy will be reviewed and approved by the Trust annually.

14. Links to other policies

This policy links to the following policies:

- Accessibility plan
- Complaints
- Equality information and objectives
- First aid
- Health and safety
- Safeguarding

How this Policy came about

The authors have used the current DfE Supporting Pupils at School with Medical Conditions (2014) as the template for this policy. They have consulted with a wide-range of key stakeholders within both Children's Services and health settings and the policy has been approved by the stakeholders and been scrutinized by the appropriate Governance.

Medicines management North Kirklees and Greater Huddersfield CCG
General Practitioner. Greater Huddersfield
School nursing service. Locala
Paediatrician. Mid Yorkshire Trust
Paediatrician Calderdale and Huddersfield Foundation Trust

Unions:
Main teaching Unions – NASUWT; NEU, NAHT
Unison
Unite

All those consulted understand the need for any setting to welcome and support young people with medical conditions who currently attend or receive our services now or in the future. No child will be excluded or refused admission because of their medical condition subject to an appropriate risk assessment being completed and/or the potential for infectious diseases to impact on the health of fellow young people and the staff.

Appendix 1 - Forms

Form 1a	Contacting Emergency Services
Form 1b	Individual Healthcare Plan
Form 1c	Agreement to Administer Medication
Form 2	Request for additional information from medical practitioner
Form 3	Record of medicine administered to an individual child
Form 4	Record of medicines administered to all pupils
Form 5	Request for child to carry their own medication
Form 6	Staff training record – administration of medicines
Form 7a	Allergy Action Plan
Form 7b	Medical Consent & Information
Form 8	School Asthma Card
Form 9	Medical Information for all Off-Site Visits
Form 10	Medication Form for Residential Visits
Form 11a	Use of Emergency AAI Consent Form

Form 1a Contacting Emergency Services

Request for an ambulance

Dial 999, ask for ambulance and be ready with the following information

Please speak slowly and clearly and be ready to repeat information, if asked.

Our telephone number:

Give your location:

State what the postcode is: WF2 8BB

1	Note the time of the call	
2	Exact location of the incident on site	
3	Name of person requesting the call	
4	Name of person calling the emergency services	
5	Name of pupil / person	
6	Date of Birth	
7	Brief description of symptoms (does the individual have a life-threatening condition e.g., is having an anaphylactic attack tell the operator the pupil has ANAPHYLAXIS. This will prioritise the response from the emergency services)	

8	Inform Ambulance Control of the best entrance and state that the crew will be met and taken to the casualty	
9	Inform a First Aider that an ambulance has been called Name of SLT member who has been informed Time	
10	Which first aider is involved in the incident	
11	Arrival time of first responder or ambulance crew	
12	Is further emergency support required from the hospital or have any other professionals attended?	
13	Did anyone cover reception during the incident?	
14	Parents/Carers contacted? Name of person contacting parents/carers Time	 Yes No

Return this form to a First Aider as soon as possible after the incident. Please ensure that all information has been completed. Thank you.

Individual Healthcare Plan

Form 1b

ONLY REQUIRED IF THERE IS A MEDICAL CONDITION

Form 1C

Agreement to Administer Medication

Nurturing inclusive learning communities

THE ACADEMY WILL ONLY GIVE YOUR CHILD MEDICINE WHEN YOU COMPLETE AND SIGN THIS FORM. THE ACADEMY HAS A POLICY THAT STATES STAFF CAN ADMINISTER MEDICINE.

Name of Academy:

Name of Pupil:

Date of Birth:

Group/Class:

Year:

Date for review to be initiated by:

Condition/Illness:

Medicine

Name/Type of medicine: *(as described on the container)*

Expiry date:

Dosage and method:

Timing:

Special precautions/other instructions:

Self-administered: Yes / No

Are there any side effects that the academy/setting needs to know about?

NB: Medicines must be in the original container as dispensed /purchased Non-Prescription Medicines (Does NOT include aspirin)

Asthma – Inhalers	
The academy is allowed to buy spare salbutamol inhalers, without a prescription, for use in emergencies. These are not shared.	
I give permission for my child to use one in an emergency:	Yes / No
Non-Prescription Medicines– Paracetamol (Does NOT include aspirin)	
I give permission for my child to take paracetamol provided by the academy	Yes / No
I confirm that my child has used this medication before and did not suffer any allergic or other adverse reaction.	Yes / No
<i>Ethos Academy Trust confirm that the maximum dosage will not be exceeded if they are administered.</i>	
Family Contact Information	
Name:	Relationship to Child:
Home No:	Mobile No:
Work No:	
I understand that I must deliver the medicine personally to:	

The above information is, to the best of my knowledge, accurate at the time of writing and I give consent to academy staff administering medicine in accordance with the academy's policy. I will inform the academy immediately, in writing, if there is any change in dosage or frequency of the medication or if the medicine is stopped.

I am aware that if my child refuses to take their medication, staff cannot force them to and I will be informed as soon as possible.

Allergy Action Plan

THIS CHILD HAS THE FOLLOWING ALLERGIES:

Name:

DOB:

Photo

Emergency contact details:

1)

2)

Child's Weight: Kg

How to give EpiPen®

Form fist around EpiPen® and PULL OFF BLUE SAFETY CAP

SWING AND PUSH ORANGE TIP against outer thigh (with or without clothing) until a click is heard

HOLD FIRMLY in place for 10 seconds

REMOVE EpiPen®. Massage injection site for 10 seconds

Keep your EpiPen device(s) at room temperature, do not refrigerate.

For more information and to register for a free reminder alert service, go to www.epipen.co.uk

Produced in conjunction with:

©The British Society for Allergy & Clinical Immunology
www.bsaci.org Approved Oct 2013

Mild-moderate allergic reaction:

- Swollen lips, face or eyes
- Itchy / tingling mouth
- Hives or itchy skin rash
- Abdominal pain or vomiting
- Sudden change in behaviour

ACTION:

- Stay with the child, call for help if necessary
- Give antihistamine:
- Contact parent/carer (if vomited, can repeat dose)

Watch for signs of ANAPHYLAXIS (life-threatening allergic reaction):

- AIRWAY:** Persistent cough, hoarse voice, difficulty swallowing, swollen tongue
- BREATHING:** Difficult or noisy breathing, wheeze or persistent cough
- CONSCIOUSNESS:** Persistent dizziness / pale or floppy suddenly sleepy, collapse, unconscious

If ANY ONE of these signs are present:

1. Lie child flat. If breathing is difficult, allow to sit
2. Give EpiPen® or EpiPen® Junior
3. Dial 999 for an ambulance* and say ANAPHYLAXIS ("ANA-FIL-AX-IS")

If in doubt, give EpiPen®

After giving EpiPen:

1. Stay with child, contact parent/carer
2. Commence CPR if there are no signs of life
3. If no improvement after 5 minutes, give a further EpiPen® or alternative adrenaline autoinjector device, if available

*You can dial 999 from any phone, even if there is no credit left on a mobile. Medical observation in hospital is recommended after anaphylaxis.

Additional instructions:

This is a medical document that can only be completed by the patient's treating health professional and cannot be altered without their permission.

This plan has been prepared by: _____

What to do if a child is having an asthma attack

- 1 Help them sit up straight and keep calm.
- 2 Help them take one puff of their reliever inhaler (usually blue) every 30-60 seconds, up to a maximum of 10 puffs.
- 3 Call 999 for an ambulance if:
 - their symptoms get worse while they're using their inhaler – this could be a cough, breathlessness, wheeze, tight chest or sometimes a child will say they have a 'tummy ache'
 - they don't feel better after 10 puffs
 - you're worried at any time.
- 4 You can repeat step 2 if the ambulance is taking longer than 15 minutes.

Form 9

Medical Information for all off-site visits during 2020/21

It is essential that the information provided on this form is up to date and accurate. Please notify the academy in writing of any changes to your child's health or medication.

Child's Full Name & Date of Birth	
Group	

Does your child suffer from any conditions requiring medical treatment, including medication	YES / NO
	If YES please give details:
Does your child have an Individual Healthcare Plan	YES / NO
To the best of your knowledge has your child been in contact with any contagious or infectious diseases (within the last 4 weeks)?	YES / NO
	If YES please give details
Does your child have any allergies? I.e., Hayfever, food allergies etc	YES / NO
	If YES please give details:
Has your child received a tetanus injection in the last three years?	YES / NO
In an emergency if a doctor advises an anti-tetanus injection following an injury, do you agree to this?	YES / NO
Are there any additional health concerns that may make taking full part in any trip difficult in anyway? Please outline here:	

Please ensure your child carries any emergency medication they need with them at all times.

Failure to do so may prevent them from attending the trip. (This includes inhalers, epi-pens etc).

This form will be kept for the whole academic year. You must inform the academy as soon as possible of any changes to your child's medical condition or medication.

Form 11a
**Use of Emergency Adrenaline Auto Injector Consent Form for Pupils
 Prescribed an AAI**

For children who are showing signs of a severe allergy or anaphylaxis

I can confirm that my child has been diagnosed with an allergy and has been prescribed an adrenaline auto injector (AAI).

My child has two working, in-date adrenaline auto injector, clearly labelled with their name, which they will bring with them to the academy every day and keep with them. A spare is also kept in the main academy office.

In the event of my child displaying symptoms of a severe allergy and if their adrenaline auto injector is not available or is unusable, I consent for my child to receive the academy's adrenaline auto injector which is kept for any emergencies.

www.asthma.org.uk

Common signs of an asthma attack include any one or more of the following:

- Coughing.
- Shortness of breath.
- Wheezing.
- Tightness in the chest.
- Being unusually quiet.
- Difficulty speaking in full sentences.
- Lips are blue.

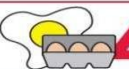

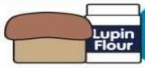

14 Allergens

Coming to a food label near you

The way allergens are labelled on prepacked foods is changing because of new regulations. The Food Information Regulation, which comes into force in December 2014, introduces a requirement that food businesses must provide information about the allergenic ingredients used in any food they sell or provide.

There are 14 major allergens which need to be mentioned (either on a label or through provided information such as menus) when they are used as ingredients in a food. Here are the allergens, and some examples of where they can be found:

1		Celery This includes celery stalks, leaves, seeds and the root called celeriac. You can find celery in celery salt, salads, some meat products, soups and stock cubes.
		Cereals containing gluten Wheat (such as spelt and Khorasan wheat/Kamut), rye, barley and oats is often found in foods containing flour, such as some types of baking powder, batter, breadcrumbs, bread, cakes, couscous, meat products, pasta, pastry, sauces, soups and fried foods which are dusted with flour.
2		
3		Crustaceans Crabs, lobster, prawns and scampi are crustaceans. Shrimp paste, often used in Thai and south-east Asian curries or salads, is an ingredient to look out for.
		Eggs Eggs are often found in cakes, some meat products, mayonnaise, mousses, pasta, quiche, sauces and pastries or foods brushed or glazed with egg.
4		
5		Fish You will find this in some fish sauces, pizzas, relishes, salad dressings, stock cubes and Worcestershire sauce.
		Lupin Yes, lupin is a flower, but it's also found in flour! Lupin flour and seeds can be used in some types of bread, pastries and even in pasta.
6		
7		Milk Milk is a common ingredient in butter, cheese, cream, milk powders and yoghurt. It can also be found in foods brushed or glazed with milk, and in powdered soups and sauces.
		Molluscs These include mussels, land snails, squid and whelks, but can also be commonly found in oyster sauce or as an ingredient in fish stews
8		
9		Mustard Liquid mustard, mustard powder and mustard seeds fall into this category. This ingredient can also be found in breads, curries, marinades, meat products, salad dressings, sauces and soups.
		Nuts Not to be mistaken with peanuts (which are actually a legume and grow underground), this ingredient refers to nuts which grow on trees, like cashew nuts, almonds and hazelnuts. You can find nuts in breads, biscuits, crackers, desserts, nut powders (often used in Asian curries), stir-fried dishes, ice cream, marzipan (almond paste), nut oils and sauces.
10		
11		Peanuts Peanuts are actually a legume and grow underground, which is why it's sometimes called a groundnut. Peanuts are often used as an ingredient in biscuits, cakes, curries, desserts, sauces (such as satay sauce), as well as in groundnut oil and peanut flour.
		Sesame seeds These seeds can often be found in bread (sprinkled on hamburger buns for example), breadsticks, houmous, sesame oil and tahini. They are sometimes toasted and used in salads.
12		
13		Soya Often found in bean curd, edamame beans, miso paste, textured soya protein, soya flour or tofu, soya is a staple ingredient in oriental food. It can also be found in desserts, ice cream, meat products, sauces and vegetarian products.
		Sulphur dioxide (sometimes known as sulphites) This is an ingredient often used in dried fruit such as raisins, dried apricots and prunes. You might also find it in meat products, soft drinks, vegetables as well as in wine and beer. If you have asthma, you have a higher risk of developing a reaction to sulphur dioxide.
14

Form 2.4 What to do during Anaphylaxis (A Severe Allergic Reaction)

Recognition and management of an allergic reaction/anaphylaxis

Signs and symptoms include:

Mild-moderate allergic reaction:

- Swollen lips, face or eyes
- Itchy/tingling mouth
- Hives or itchy skin rash
- Abdominal pain or vomiting
- Sudden change in behaviour

ACTION:

- Stay with the child, call for help if necessary
- Locate adrenaline autoinjector(s)
- Give antihistamine according to the child's allergy treatment plan
- Phone parent/emergency contact

Watch for signs of ANAPHYLAXIS (life-threatening allergic reaction):

- | | |
|-----------------------|---|
| AIRWAY: | Persistent cough
Hoarse voice
Difficulty swallowing, swollen tongue |
| BREATHING: | Difficult or noisy breathing
Wheeze or persistent cough |
| CONSCIOUSNESS: | Persistent dizziness
Becoming pale or floppy
Suddenly sleepy, collapse, unconscious |

IF ANY ONE (or more) of these signs are present:

1. Lie child flat with legs raised:
(if breathing is difficult, allow child to sit)   
2. **Use Adrenaline autoinjector* without delay**
3. **Dial 999** to request ambulance and say ANAPHYLAXIS

***** IF IN DOUBT, GIVE ADRENALINE *****

After giving Adrenaline:

1. Stay with child until ambulance arrives, do NOT stand child up
2. Commence CPR if there are no signs of life
3. Phone parent/emergency contact
4. If no improvement **after 5 minutes, give a further dose** of adrenaline using another autoinjector device, if available.

Anaphylaxis may occur without initial mild signs: **ALWAYS use adrenaline autoinjector FIRST in someone with known food allergy who has SUDDEN BREATHING DIFFICULTY** (persistent cough, hoarse voice, wheeze) – even if no skin symptoms are present.

Form 2.5 Epilepsy - What to do when someone has a seizure

Tonic-clonic (convulsive) seizures

[Tonic-clonic seizures](#) are the type of seizure most people recognise. They used to be called grand mal seizures. Someone having a tonic-clonic seizure goes stiff, loses consciousness, falls to the floor and begins to jerk or convulse. They may go blue around the mouth due to irregular breathing. Sometimes they may lose control of their bladder or bowels, and bite their tongue or the inside of their mouth.

Here's how to help if you see someone having a tonic-clonic seizure.

DO:	<ul style="list-style-type: none"> • Protect them from injury (remove harmful objects from nearby) • Cushion their head • Look for an epilepsy identity card or identity jewellery – it may give you information about their seizures and what to do • Time how long the jerking lasts • Aid breathing by gently placing them in the recovery position once the jerking has stopped (see picture) • Stay with the them until they are fully recovered . Be calmly reassuring
DO NOT:	<ul style="list-style-type: none"> • Restrain their movements • Put anything in their mouth • Try to move them unless they are in danger • Give them anything to eat or drink until they are fully recovered • Attempt to bring them round
Call for an ambulance if:	<ul style="list-style-type: none"> • You know it is their first seizure or • The jerking continues for more than five minutes or • They have one tonic-clonic seizure after another without regaining consciousness between seizures or • They are injured during the seizure or • You believe they need urgent medical attention

Focal seizures	
<p>You may also hear this type of seizure called a partial seizure. Someone having a focal seizure may not be aware of their surroundings or what they are doing. They may have unusual movements and behaviour such as plucking at their clothes, smacking their lips, swallowing repeatedly or wandering around.</p> <p>Here's how to help if you see someone having a focal seizure.</p>	
DO:	<ul style="list-style-type: none"> • Guide them away from danger (such as roads or open water) • Stay with them until recovery is complete • Be calmly reassuring • Explain anything that they may have missed
DO NOT:	<ul style="list-style-type: none"> • Restrain them • Act in a way that could frighten them, such as making abrupt movements or shouting at them • Assume they are aware of what is happening, or what has happened • Give them anything to eat or drink until they are fully recovered • Attempt to bring them round
Call for an ambulance if:	<ul style="list-style-type: none"> • You know it is their first seizure or • The seizure continues for more than five minutes or • They are injured during the seizure or • You believe they need urgent medical attention

Form 2.6 Diabetes – How to treat Hypoglycaemia (low blood sugar) or Hyperglycaemia (high blood sugar)

Treating severe hypos: seizures

When a seizure is occurring, it will not be possible for a person to take sugar. It is also not advised to feed someone when they are having a seizure as this could lead to choking.

Where possible try to ensure the person having the seizure will not hit anything and cause themselves injury.

If they are on the floor, place something soft like a pillow or article of clothing to cushion their head.

Often a seizure will pass after a few minutes and this may allow the person having the seizure to take some sugar. If the seizure persists for more than 5 minutes, call for an ambulance.

How to Treat a Hypo (low blood sugar)

Hypos are periods of low blood sugar. Although common for diabetics, a hypo can be unnerving.

With appropriate treatment the effects and length of hypos can be reduced.

Noticing you're having a hypo

Before you can treat the hypo, you need to notice that you are low on blood sugar. The sooner you notice hypoglycaemia, the less disruptive it's likely to be.

Typical signs of hypoglycaemia include:

- Feeling suddenly tired or weak
- Having difficulty concentrating
- Exaggerated mood changes
- Feeling dizzy

Hypos can occur at any time, pay close attention to your blood sugar levels when exercising, playing sports or during physical activity.

Check it is a hypo by blood glucose testing	<p>Where possible, <u>test your blood sugar</u> to ensure it is low blood sugar as some of the signs of low blood sugar may also represent higher blood sugar (such as tiredness or mood changes).</p> <p>If you cannot test and are unsure if you have low or high blood glucose, it may be best to treat it as a hypo as hypoglycaemia can quickly become dangerous if left untreated.</p>
Act quickly	<p>It is important that as soon as you notice or confirm you are hypo you treat the hypo immediately.</p> <p>Immediate hypo treatment helps by:</p> <ul style="list-style-type: none"> • Preventing a severe hypo occurring • Speeding up recovery • Reducing the chances of losing hypo awareness
Treatment	<p>Treating a hypo involves taking quick acting carbohydrate, such as a sugary drink or glucose tablets. This should be followed by a longer-acting carbohydrate, such as a cereal bar, sandwich or piece of fruit and the individual testing their blood glucose.</p>
